Advanced Querying	●	○
Customizable	●	◐

JFrog is the creator of Artifactory, the heart of the end-to-end, hybrid JFrog Universal DevOps Platform for automating, managing, securing, distributing and monitoring software packages. As a leading universal, highly available enterprise DevOps solution, the JFrog Platform empowers customers with trusted and expedited software releases from code-to-production. JFrog is trusted by more than 6,000 customers, and top global brands such as Amazon, Facebook, Google, Netflix, Uber, VMware, and Spotify depend on JFrog to manage binaries for their mission-critical applications.
